```java
public class ComputeBean{
   @EJB(mappedName="ValidatorBean/remote")
   Validator validator;
   public double compute(double n1, double n2){
      if (!validator.iszero(double num))
         return n1/n2;
      else
         // throw exception
   }
}
```

```java
public class ValidatorBean{
   public boolean iszero(double num){
      if (Math.abs(num < 0.000001))
         return true;
      else
         return false;
   }
}
```
